

don't save lamp, save energy, save our Earth

Sensor Light Intelligent Auto Dimming

Sentinel

Description

A clever integration of sensor technology with our proprietary Intelligent **Auto Dimming** Circuitry into a compact surface luminaire that capitalized the cost effectiveness and energy saving characteristic of **T5** fluorescent lamp.

Application

It is specifically designed for installation in places with low human traffic but need to be lighted up to meet safety requirement, such as :

- Staircase
- Corridor
- Walkway
- Overhead Bridges
- Underpass

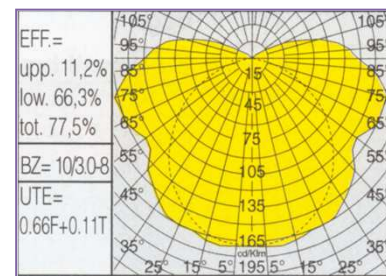

Design

Integrating 2 numbers of infra-red motion sensors that provide a 6m x 4m of coverage. Activation of the auto dimming circuitry after 90 seconds of last detected movement.

Construction

Housing make from electro-galvanized steel, polyester powder coated, mirror reflector and prismatic front diffuser for enhance uniform illumination and ingress protection.
